

Ground Station API

Method

Query devices

Description:

List all devices.

Example:

GET /api/devices

Response:

Parameter	Description
id	Device's id

Example:

```
{
  "devices": [
    {
      "id": "RCKH"
    },
    {
      "id": "TPE"
    }
  ]
}
```

Query a device

Description:

List device by device id.

Request:

Parameter	Description	Type
Device_id	Device id	String

Example:

GET /api/devices/RCKH

Response:

Parameter	Description
Id	Device's id
Name	Device's name

Example:

```
{
  "RCKH": [
    {
      "id": "RCKH",
      "name": "CONSOLE40-RCKH"
    }
  ]
}
```

Create a device

Description:

Create device by device id.

Request:

Parameter	Description	Type
Device_id	Device id	String

Example:

POST /api/devices/RCKH

Response:

No specific response. It returns an empty success response if completed without error

Query sessions

Description:

List all sessions.

Example:

GET /api/sessions

Response:

Parameter	Description
id	Session id

Example:

```
{
  "sessions": [
    {
      "id": 3,
      "startTime": "Mon, 10 Jan 2022 17:57:58 GMT"
    },
    {
      "id": 4,
      "startTime": "Fri, 14 Jan 2022 16:26:59 GMT"
    },
    {
      "id": 5,
      "startTime": "Fri, 14 Jan 2022 16:27:05 GMT"
    },
    {
      "id": 6,
      "startTime": "Fri, 14 Jan 2022 16:28:45 GMT"
    },
    {
      "id": 7,
      "startTime": "Wed, 19 Jan 2022 10:43:29 GMT"
    },
    {
      "id": 8,
      "startTime": "Wed, 26 Jan 2022 09:39:51 GMT"
    }
  ]
}
```

Query a session

Description:

List session details by session id.

Request:

Parameter	Description	Type
Session_id	Session id	Integer

Example:

GET /api/sessions/8

Response:

Parameter	Description
Id	Session id
Name	Session start time
Device list	List all devices in this session

Example:

```
{
  "session": {
    "devices": [
      {
        "id": "RCKH",
        "name": "CONSOLE40-RCKH"
      },
      {
        "id": "RCKH",
        "name": "CONSOLE40-RCKH"
      }
    ],
    "id": 8,
    "startTime": "Wed, 26 Jan 2022 09:39:51 GMT"
  }
}
```

Create a session

Description:

Create session.

Example:

POST /api/sessions

Response:

Parameter	Description
Session_id	Session id

Example:

```
{
  "session_id": 78
}
```

Add device

Description:

Add device to session.

Request:

Parameter	Description	Type
Session_id	Session id number	Integer
Device_id	Device id	String

Example:

```
POST /sessions/78/XXXX
```

Response:

No specific response. It returns an empty success response if completed without error

Start session

Description:

Start a session for record flight data.

Request:

Parameter	Description	Type
Session_id	Session id	Integer

Example:

```
POST /start_session/78
```

Response:

No specific response. It returns an empty success response if completed without error

Stop session

Description:

Stop a session.

Request:

Parameter	Description	Type
Session_id	Session id	Integer

Example:

```
POST /stop_session/78
```

Response:

No specific response. It returns an empty success response if completed without error

Query flight records

Description:

List a device flight records in a session.

Request:

Parameter	Description	Type
Session_id	Session id number	Integer
Device_id	Device id number	String

Example:

GET / flight_data/1/RCKH

Response:

Example:

```
{
  "RCKH ": [
    {

Query session flight records

Description:

List all flight records in a session.

Request:

Parameter	Description	Type
Session_id	Session id number	Integer

Example:

GET / flight_data/1

Response:

Example:

Working on it
